

Noise Cancelling Headphones

Silence Has Never Been So Good.

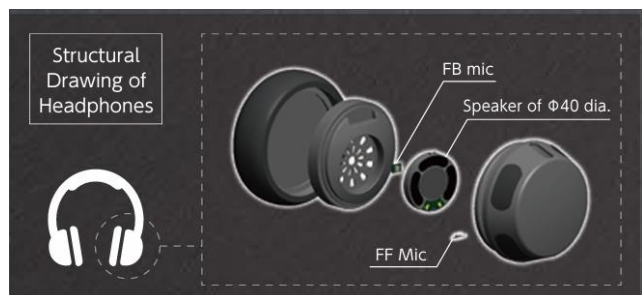

Noise cancelling headphones with excellent sound isolation over a wide frequency range

**Sound Isolation over a Wide Range of Frequencies,
with Two Types of Noise-cancelling Strategy**

Features

- "Headphones excel in PNC (Passive Noise Cancellation); Natural sound isolation is achieved by the mechanical construction"
Improved internals of the headphones has greatly improved the PNC characteristics.

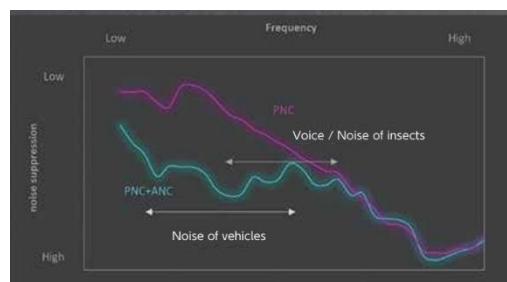

●Specification indicated in this Technical Report is outline only at present. Any products in this Technical Report are subject to any modification for further development and the products improvements without prior notification. ●When employing the product, use of an officially authorized specification is recommended. ●Please feel free to contact us with any enquiries about our products and their uses.

Features

- Adding ANC to PNC has achieved improved sound isolation over a wider range of frequencies

- Switchable between ANC (HIGH/LOW) and Transparency Mode

With the HIGH mode, external sound is maximally suppressed; While in the LOW mode, minimal noise suppression is provided. With the Transparency Mode feature, you can hear external sounds without taking off the headphones ensuring safe comfortable operation. A single button is used to select the optimal mode for the best audio, to accommodate any situation.

Applications

- Listening to music
